

Unable to Launch the Application: Error: Unsigned application requesting unrestricted access to system

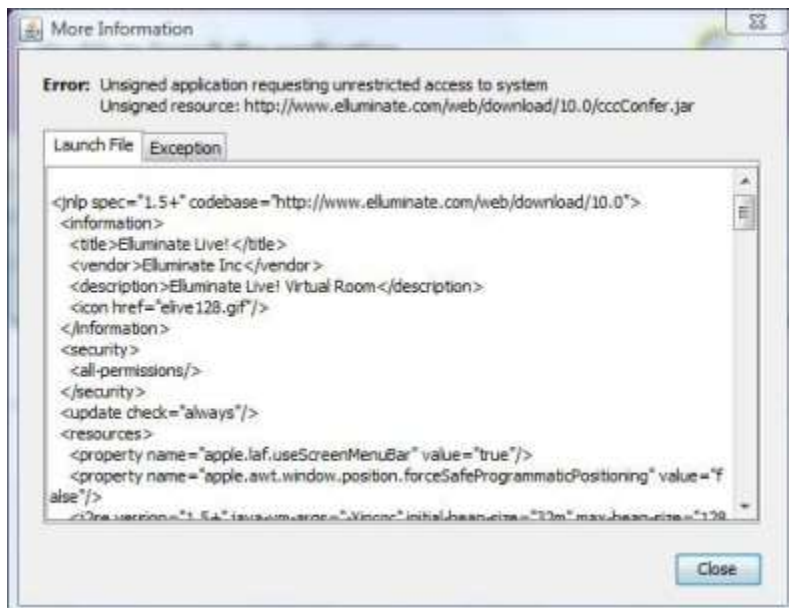

ANSWER:

When launching a session it is possible that cached java files can cause problems launching new sessions and receive the following error. This is due to a known issue in Java 6, update 33 as well as Java 7, update 5, as reported by Oracle

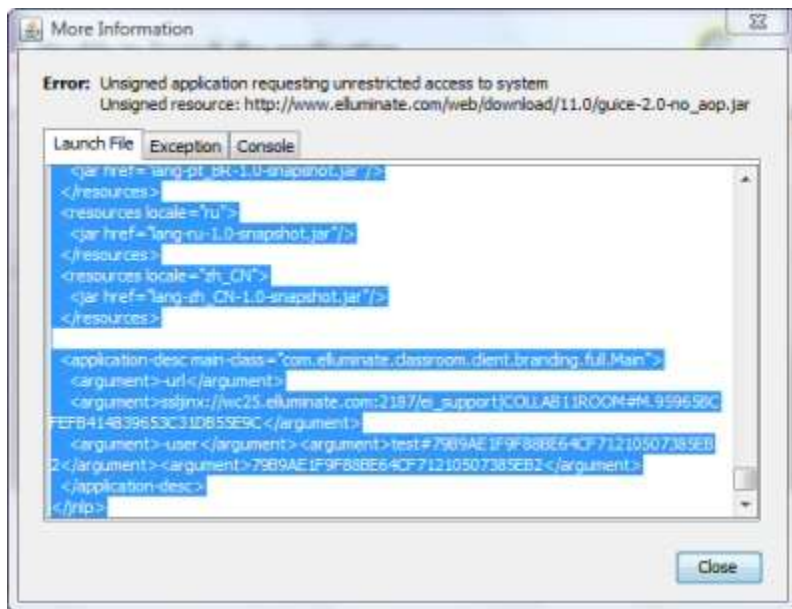

here: http://www.java.com/en/download/help/clearcache_upgrade.xml

When clicking the **Details** button, users will see the following message:
Error: Unsigned application requesting unrestricted access to system

Eliminate Live! v10

Blackboard Collaborate 11 web conferencing

Solution
