Apply a new SPSS license using the Authorization Wizard

You will need to be connected to the Internet to successfully update your SPSS license!

1. Start the IBM SPSS License Authorization Wizard:

   **Windows**
   
   - In the **Start** menu, select **All Programs**.
   - In your list of programs, you will see a folder called either SPSS or IBM SPSS Statistics. Open that folder.
   - In that folder, you will see a program called either **SPSS License Authorization Wizard** or **IBM SPSS Statistics License Authorization Wizard**.
   - Right-click the **License Authorization Wizard icon** and select **Run as Administrator**.
     - If you do not have a Windows user account with full Administrator rights, please see your local system administrator or technical support provider.
   - The License Authorization Wizard should then launch.

   **Mac OS X:**
   
   - In your Applications folder, you should see either an IBM folder or an SPSS folder. Open that folder.
   - Inside that folder should be a folder called **SPSS 23**. Open that folder.
   - You should see an application called **License Authorization Wizard**. Double-click that program.
   - The License Authorization Wizard should then launch.

2. The wizard should display the **License Status** window, which shows the authorization status for all detected SPSS components. Select **Next**.

3. On the **Product Authorization** window, select the button next to **License my product now**. Select **Next**.

4. Enter the authorization code (you can use copy/paste) you received in your SPSS Alliant request confirmation, then select **Next**.

5. If successful, the installer should report "Successfully processed all codes." Select **Next**.

6. Select **Finish**. You have now completed the installation and license the authorization of your new SPSS software.
